> Messrs, Jacob Sayler and I. A. Feibel were appointed as a committee to go to Newport and confer with Mr. Dueber concerning the amount of lucre which would induce him to bring his manufactory to this place, and if possible to get the gentleman to come and view the landscape o'er. Mr. Dueber having been absent in the East for some time dinary, and promised that Mr. Dueber would come to Hillaboro—that is—not the manufactory but the manufacturer. There is no question but that Hillaboro wants the watch works and will try to get them here but there lurks in the minds of a good many of our citizens the idea that it may all be an advertising scheme. If Mr. Dueber is "in earnest," then Hillaboro is in earnest, but she is no more so than many surrounding towns and cities with whom she must compete. A Newport land-owner has offered to sell his property to Mr. Dueber at \$4.000 less. sell his property to Mr. Dueber at \$4,000 less per acre than formerly in order to retain the works. If Hillsboro is to secure the coveted manufactory she must dilate upon her ad-

vantages and shell out the coin.

who take an interest in the management of the County Infirmary that the "crazy house" was in a bad condition and that matters instead of growing better have been getting worse. The insane have been steadily increasing in number, the building is confined to his home on Lafayette street, being very sick from old age and general debility. For some time it has been known to tho crowded, and the structure at first could not have been well fitted for its intended purpose. At present it is, as the Gazette says, weeks ago, is now rapidly improving and will recover. rom any fault of the superintendent but of sewerage, and of general adaptation. The crazy house is dilapidated, the timbers in the floor are rotten, and the entire frameis giving way. In many places the loor is broken and patched with plank and tin and sinc, in some places the floor gives under your feet at every step, and in others It has sunk, leaving a space of several inches between it and the base-board. From these statements it is not hard to imagine how upcomfortable the building would be n winter. No heating apparatus can thoroughly warm the building, and the Superintendent has often been obliged to remain up

Blaine.

Blaine, all night attending to fires and keeping the insane persons from burning themselves at the stoves.

In the women's department, upstairs in the main building, little children are compelled to mingle with women, old and young, in every stage of imbedility and idiooy, and with vile mouthed bags, utterly devoid of character. The institution is so devoid of character. The institution is so over crowded that a number of lunatics the weak are at the mercy of the strong, and fights are frequent. The inmates now number eighty-two, and of these fourteen are inare chi dren, two are helpless cripples, nine and five are over eighty. The county has thirteen more than its quota at the Athens Insane asylum and it is only through the solicitations of Probate Judge Dittey and other officials on account, of the miserable ondition of our Infirmary that these have seen retained so long. It is certainly nece sary that ome provision be made, so luna-tics may be divided from the sane, and that little children be separated from the depraved and idiotic.

For the purpose of discussing some improvement of this sort, the County Commisoners met the Board of Directors at the Infirmary on Wednesday of last week. Repesentatives of the Gazette and News-HER-ALD and a few visitors were present. Several plans were discussed and although none was adopted, both Boards recognize the necessity of doing something and are resolved to do it. The plan which seems to find most favor is to remove the old "crazy house" and build almost upon its site a larger structure, forming an extension of the east end of the main building. It is proposed that this shall be long enough to contain eight or nine cells of a medium size and wide enough to allow a good hall between the two rows of cells. Much of the brick and stone of the old building can be used, and will reduce

the cost of the new. What cries for attention more than anything else about the Infirmary, is the loathome stench which arises from every quarter. management, it is not intentional, for the odor results from accumulations of running without sewerage or any adequate ly leave out of type, but every citizen should strained to publish it. The privy is in an inhouse. It has long been the custom to set to remove it and cover the excrement with earth. So long has this practice been kept up that the ground is full of filth which

Miss Mary Rhoads, living a few miles south west of this place, was agreeably surprised on the 10th inst. by a company of her young friends from the vicinity of Rainsboro, the young gentlemen being members of a string band and the young ladies being full of fun and life. Miss Mary was furnished some nice music by the boys, while the young ladies kept her talking until the evening was far spent. The Women's Forsign Missionary Society of the M. E. Church, held their yearly public meeting at the church on last Tuesday evening as pre-arranged. The exercises of the evening consisted of music, easely, and short addresses by different sisters, setting forth the good being done by the mission work, and also impressing upon the minds of the hearers the great work yet to be done. The meeting was quite interesting, and has been a source of great good to the society at this place as well as the heathen abroad. Reports from the various officers of the Society were read and accepted. The meeting was well attended by the members of the Society.

up that the ground is full of filth which cozes from the surface, and the air is heavy with nauseous odors. One man lay dead in his cell on the day of our visit and another horself ow, and has since died. We do not assert that these deaths resulted from the unhealthy surroundings, but the air the inmates breathe must induce and foster disease.

No place is better adapted for a perfect system of sewerage than the ground just back of the Infirmary. A little more than one hundred yards away is a small ravine, with enough depth to furnish an excellent fall for a drain. As was remarked by a bystander while the party was viewing the ground, the ravine seems ordained by Providenes for the contemplated purpose.

Auditor LeFevre figures the cost of the new building at about \$6000, and others do

Two agents for a fancy fire extinguisher, which is nothing more than a two-quart squirigun, struck the town about two weeks ago and have ever sines been tormenting our Council, insisting that their little machine was the one thing needful, that it will put out a fire of any possible magnitude, and that the town should be fortified against the ravages of the fire flend by possessing a full stock of "extinguishera." During the fire in the Dunlap block the squirt-gunnists failed to turn up, but immediately after they renewed their afforts with the Council with fresh vigor, and our city fathers promised to witness a trial of the extinguishers. A large pile of boxes and boards was ignited near the Ohio Southern depot and a large crowd gathered to look on. As soon as the pile was enveloped in fiames the agents began operations, but all to no purpose, for the squirt-guns failed to check the confagration. The crowd hooted and jeered and somebody asked if the squirt-guns would put out a cigar, and at the last reports the gents still remain on their ear.

PRICETOWN.

The wheat is growing rapidly. The prospect is fine for a good harvest. The early sowing of oats is coming up, not withstanding the heavy snow fall. At this writing our friend and neighbor, Walter Faris, is moving near Mt. Washington. The prospect for fruit is favorable. Cherry, plums, apples, in fact all trees are coming forth in sufficient bloom.

There is a man going over the country making himself very fresh. He takes the liberty to inquire all about what you have and what you haven't. He invariably asks how much money you have on hands. It seems a very foolish question to be asking these Democratic times.

Born—On Wednesday morning, April 14th, 1885, a daughter to Mr. and Mrs. Frank M. Horsman. The news flew over the wires.

The H. C. T. A. will meet at this place on the second Saturday in May, and it is hoped that our citizens will do all they can to make the meeting a success.

Last Saturday after the usual routine of swearing in the newly elected officers, an epithat our citizens will do all they can to make the meeting a success.

Last week Evert McCoy and Fredrick Brabson left their parental roofs without the knowledge of their parental roofs without the knowledge of their parental. They were found at Amboy, ind., and were brought home Friday by Elwood Brabson and Robert McCoy Another one of our young boys started last Thursday for parts unknown. Johnnie Ladd, son of John Ladd. It appears that the boys are growing tired of their good homes. We woulk advise them to stay at home, for the time will soon come when they will have to give them up for all time.
